# INDEX TO VOLUME VII.

## GENERAL ALPHABETICAL INDEX.

*Entries from the Synopsis of Periodical Literature are indicated by S. (Synopsis); from the Analysis of Current Electrochemical, Chemical and Metallurgical United States Patents by P. (Patents); from the Digest of Electrochemical United States Patents Prior to July, 1902, by D. (Digest). Illustrated articles are indicated by *.*

### A

ABBE Engineering Co.....45, 232
Abrasive. Alumina-silica. Tone. (P.).. 35
——See also Aloxite, Alumina, Alundum, Carborundum.
Acetone solutions for metal deposition, Patten and Mott..... 273
Acetylene chlorides. Perkin (S.)...221, 303
Acetylene lamps for miners. Morrison.. 138
Acheson, E. G.....104, 316
——Portrait ..... 271
Acid egg. Automatic. Meade..... 360
Acid-proof tanks. Betts..... 284
Allis-Chalmers Co..... 175
ALLOYS:
——Aluminium, copper, tin (S.)..... 493
——Anti-friction alloy. Touceda. (P.).. 454
——Bearing metal. Black. (P.)..... 127
——Chromium-Manganese. (S.)..... 34
——Iron alloys. Physical characteristics. Burgess and Aston..... 436
——Iron alloys with arsenic and tin. Magnetic properties. Burgess and Aston..... *403
——Iron alloys with arsenic and bismuth. Burgess and Aston..... 276
——Iron-silicon-carbon. Gonterman. (S.) 34
——Manganese-iron. Burgess and Aston. *476
——Platinum-antimony. (S.)..... 169
——Silicon-calcium-aluminium..... 131
——Substitute for platinum. (P.)..... 496
——Titanium-silicon. Becket. (P.)..... 123
——Alloys by electrodeposition. Field. (S.)..... 364
——Alloys of non-ferrous metals. Thermal treatment. (S.)..... 325
——Zinc-copper. Elliott. (P.)..... 369
——See also Ferro-alloys and the different metals.
Aloxite ..... 192
Alumina. Tone. (P.)..... 35
Alumina refractories. Higgins. (P.)..... *223
ALUMINIUM:
——process. Betts. (P.)..... 539
——Blackmore. (P.)..... 224
——from silicates. (P.)..... 366
——Moldenhauer. (S.)..... 168
——Three new works in Great Britain... *26
——Reduction in laboratory. Thompson. 19
——Seligman. ..... 148
——Tucker. ..... *315
——Electrolytic Condensers. Schulze... *216
——deposited from aqueous solution. Tucker and Thomssen..... 273
——plating. Szarvasy. (S.)..... 325
——Aluminium Corporation..... 165
——Duty on..... 48
——for deoxidizing steel slags. Thallner. (P.)..... 539
——agreement ..... 546
——syndicate ..... 413
——solder. Lambert..... 49
——Carroll and Adams..... 49
——Tamassy. (P.)..... 455
——Guggenbuhl. (P.)..... 455
——welding ..... 48
——Schoop .....*151, *193, 234, 284
——Aluminium carbide. Askenasy. (S.). 127
——Aluminium silicate. Tone. (P.)..... 35
——Aluminium-copper-tin alloys. Edwards .....493, 534
——Aluminium-calcium-silicon alloys..... 131
Alumino thermics. (See Thermit.)
Alundum, as refractory..... 438
Amalgamation. Electrocyanide. Parks. (P.)..... 540
Amalgamation with Electrolysis. Carey. *228
Amalgamator. Pierce. ..... *540
American Blower Co..... 547
American Chemical Society. Baltimore meeting. ..... 54
——Detroit meeting. .....242, 339
American Electric Furnace Co..... 171
American Electrochemical Society. Niagara Falls Convention....237, *249
American Electrochemical Society. New York Meeting. ..... *507
——New York Section.....147, 235
——Wisconsin Section.....139, 175, 235
American Foundrymen's Association. Cincinnati Convention ..... 244
American Institute Chemical Engineers. Pittsburgh meeting ..... *57
——Brooklyn meeting .....298, 359
American Metal Market..... 137
American Sheet & Tin Plate Co..... 459
American Tinol Co..... 331
Ammeter. Mercury..... *369
——for large currents. Northrup..... *276
Ammonia. Liquid..... 63
Ammonia. Synthetic. (S.)..... 222
Ammonia in 1908..... 422
Amsler hot-blast stove..... *542
ANALYSIS:
——coal. Gudeman..... 57
——copper for refineries. Kann. (S.)... 85
——flue gases in boiler tests. Hunicke.. 59
——Electrolytic. E. F. Smith..... 513
——iron ores. U. S. Steel Corporation.. *65
——soil. Cameron ..... 281
——Analyzed chemicals. J. T. Baker. (S.) ..... 324
——See also Electroanalysis.
Annealing furnace. Rockwell..... *457
Anode of iron oxide. Specketer. (P.)... 454
Anodes. Manganese peroxide..... 547
Anode effect. Aluminium.....19, 148
——Calcium ..... 531
Anti-friction metal..... 325
Antimony. Pautrat. (S.)..... 126
Antimony, Explosive. R. C. Palmer..... 521
Antimony-platinum alloy. (S.)..... 169
Appelberg, A..... 49
Argo Smelting Plant..... 100
Armorplates. Schneider. (P.)..... 326
Arsenic-iron alloys. Burgess..... 276
Assays. Calculations. Gahl..... 306
Association of Iron and Steel Electrical Engineers ..... 298
Atomic weights..... 296
Atomic weights. Method of calculation. Hinrichs ..... 317
——Sang ..... 382
Autogenous Welding Equipment Co..... 90

### B

BAEKELAND, Nichols medal..... 504
——Portrait ..... 276
Bakelite, Backeland .....111, 144, *276
Baker, J. T., Chemical Co..... 324
Ball mills. Abbe..... *232
Bausch & Lomb Optical Co....289, 333, 372
Bauxite. French ..... 497
Bayonne, Excursion to..... 507
Bearing metal. Black. (P.)..... 127
——Patteson ..... 21
Berlin. American Exposition..... 381
Berthelot Monument..... 244
Bimetallic conductors. Northrup..... 197
Bismuth-iron alloys. Burgess and Aston. 276
Blast. Dry blast..... 461
——Block ..... *93
——Gayley's dry blast. (P.)..... 538
——Hot blast stove. Amsler..... *542
——Uniform moisture in blast. Jones and Moore.....*488, 492
Bleaching liquor. Vogelsang. (P.)..... *36
——for sewage purification. Rideal. (S.). 168
Blooming mill. 20,000 hp. twin tandem compound engine ..... 8
Boiler plants. Pyrometry. Foster..... 132
Boiler Practice. Draft in..... 94
Boiler tests. Flue gas analysis. Hunicke..... 59
Boilers. Heat transmission in. Nicolson. 248
Boilers. Scale and corrosion. Greth..... 59
Boilers, tubes and shells. Corrosion. Walker..... 150
Boiling points of metals. Greenwood. (S.) ..... 408
BOOK REVIEWS:
——Abhandlungen der Deutschen Bunsen-Gesellschaft..... 500
——Annuario della Industria Mineraria.. 414
——Austin. Metallurgy of Common Metals ..... 548
——Billiter. Electrometallurgy of aqueous solutions..... 414
——Borchers. Electric furnaces..... 50
——Cramp and Smith. Vectors and vector diagrams..... 334
——Duff. Textbook of physics.....98, 500
——Emery. Elementary chemistry..... 414
——Engelhardt. Wärmetechnik..... 294
——Gulliver. Metallic Alloys..... 142
——Gunther. Electromagnetic ore separation ..... 460
——Hale. Calculations of General Chemistry ..... 548
——Haskins and Macleod. Organic Chemistry ..... 177
——Heinke. Handbuch der Elektrotechnik ..... 294
——Ingalls. Mineral Industry..... 141
——Isakovics. Synthetic perfumes..... 178
——Johnson. Analysis of Special Steels.. 142
——Journal of Institute of Metals..... 374
——Landolt. Erhaltung der Masse..... 500
——Law. Alloys ..... 177
——Meade. Small Chemical Laboratories ..... 236
——Mining and metallurgical industries of Canada ..... 334
——Morris. Steam power plant piping systems ..... 460
——Nagel. Mechanical Appliances of Chemical and Metallurgical Industries ..... 98
——Nernst. Theoretische Chemie..... 460
——Nystrom and Anrep. Peat in Canada ..... 374
——Parsons. Beryllium..... 177
——Pring. Some Electrochemical Centres ..... 236
——Richards. Metallurgical Calculations. 141
——Rickard. Through the Yukon and Alaska ..... 414
——Rise and progress of British explosive industry ..... 500
——Rogers. Laboratory guide of industrial chemistry ..... 141
——Rosenthal. Calculations of Transmission Lines..... 142

East Engin. Library

——Sauveur. Laboratory experiments in metallurgy ..... 141
——Savvia. Metallographia applicata.... 548
——Steinmetz. Transient Electric Phenomena ..... 178
——Steinmetz. Radiation, light and illumination ..... 548
——Tolman. Social Engineering..... 178
——Wiley. Fertilizers and Insecticides.. 50
Boron, Pure. E. Weintraub..... 509
Boron as reducing agent. (P.).....366, 455
Brass corrosion. Rhead.....493, 534
Brass. Titanium for. (P.)..... 496
Braun, F. W..... 409
Breakdown, elastic, of non-ferrous metals. Smith .....535, 537
Bristol Co.....235, 372, 459
Bristol, Wm. H..... 412
Bronze-Manganese. Jones. (S.)..... 126
Bronzes, Nickel. Adan. (S.)..... 325
Brown, Edward & Son..... 329
Buffs, triplex, for plating..... *94
Bureau of Standards.....333, 506
Burette Clamp ..... *132
Burners for welding..... 194
By-product coke ovens. Koppers..... 373

## C

CALCIUM:
——Perkin. (S.)..... 221
——Preparation. Frary and Bodger..... 531
——Calcium carbide and cyanide. (See below.)
——Calcium alloys as reducing agents. Watts and Suhm..... 280
——Calcium silicide. Willson and Haff. (P.)..... 451
——Calcium-silicon alloy. Goldschmidt. (P.).....131, 170, 284, 538
CALCIUM CARBIDE AND CYANAMIDE:
——Carbide. Catani. (P.)..... 223
——Hansen ..... *427
——Price. (P.)..... *36
——Shipment rules ..... 166
——Taussig ..... 302
——Thompson ..... 529
——Tucker, Alexander Hudson..... 280
——carbide and cyanamide works in Norway .....*212, *309, *360
——carbide in Japan. (S.)..... 221
——carbide suits..... 379
——cyanamide. Caro..... 305
Calcium cyanamide works in Norway.... *212, *309, *360
Calculations in ore concentration. Gahl.. 306
Caldwell Co..... 458
Calorimeter. Drysdale.....325, 406
Carbides. Production ..... 119
Carbon. Heat and electric conductivity. 515
Carbon removal from iron. Hatfield.... 362
Carbon cell. Jungner..... 285
Carbon dioxide recorder.....458, 547
Carborundum. Tone. (P.).....86, 167, 494
Carborundum Co. Works..... *189
Case-hardening of steel with gases. Olsen and Weiffenback..... 360
Castner-Kellner Alkali Co..... 32
Catton process..... *287
Caustic soda. (See Sodium chloride Electrolysis.)
Cellarius cell..... *90
Cement in 1908..... 94
Cementation. Lang..... 485
Centrifuge. Braun..... *409
Ceramic castings. (S.)..... 324
Chemical Energy. Electrical nature. Patterson ..... 275
Chemical stoneware exhibit..... *89
Chemical Societies. National.....51, 137
Chemists' Club Building.....335, 338, 501
Chile Saltpeter ..... 293
Chlorates by Electrolysis. Betts. (P.).. 285
Chlorination, Dry, of Sulphide Ores. Traphagen ..... 208
CHLORINE:
——Deodorized. Paramore. (P.)..... 125
——for detinning. Goldschmidt..... 79
——Sperry ..... 303
——Liquid .....296, 303
——Uses of electrolytic ..... 221
——Koller ..... 303
——See also Sodium Chloride Electrolysis.
Chromium. Becket. (P.).....36, 366
——Seward and Kirgelzen. (P.)..... 88
——Chromium-Manganese Alloys. Hindricks. (S.)..... 34
Clay control. Dean..... 360
Cleveland Bronze and Brass Works.... 91
Coal. Jones ..... 14
Coal analysis. Technical. Gudeman..... 57
Coal. Character of coal in relation to smoke. Randall..... 544
Coal dust and mine explosions. Galloway ..... 364
Coal. Washing and coking..... 173
Cobalt and nickel in 1908..... 543
Coke. Moisture in..... 126
Coke analysis. (S.)..... 34
Coke, gas, tar and ammonia in 1908.... 422
Coke ovens, Koppers' by-product..... 373
Coke-oven gas electric plant..... 136
Coking process for peat, etc. Zwingenberger ..... *347
Colby, E. A. Portrait..... 265
Collector of Precious Metal Dust..... *172
College of City of New York. Physical chemistry and electrochemistry.. *162
Colloids. Effect of electrolytes. Burton. (S.) ..... 222
Concentrating plants ..... 296
Concentrating table. Hennig..... *42
Concentration by electromagnetic flotation. Steckel ..... *275
Concentration of ore. Calculations. Gahl ..... 306
Condenser. Aluminium Electrolytic. Schulze ..... *216
Conductance of Electrolytes. Richards and Landis ..... *521
Conductance. Thermal of composite bodies. Hering..... *11
Conductivities. Thermal Furnaces. Hering ..... 72
Conductivity. Measurement. Northrup. *199
Conductivity. Electrolytic, and Magnetism. Reed..... *316
Conductivity, heat, of refractory materials. Wologdine and Queneau. *383, *433
Conductivity. Heat and electric of electrodes. C. Hering..... 514
——C. A. Hansen ..... 515
Conductivity of electric conductors. Northrup ..... 195
Conductors. Conductivity and valuation. Northrup ..... *195
Conductors, Tubular. Zimmerman..... 281
Congress of Applied Chemistry 1912 in New York .....104, 146
Congress of Applied Chemistry in London ..... *301
Congress of International Society for Testing Materials. Copenhagen. .....416, 418, 455, 456
Congress for Mining and Metallurgy. Düsseldorf, 1910..... 298
Conical Mills. Hardiage..... *47, 499
Conservation of natural resources and electrochemistry. Acheson..270, 301
Conservation of water power. Taylor... 301
Continental-American Ore Co..... 497
Cooling Curves. Automatic registration. Northrup ..... *273
COPPER:
——in 1908..... 380
——Analysis for refineries. Kann. (S.). 85
——Castings with copper-titanium. (P.). 88
——Combined roasting and smelting processes for copper ores and fines (Fink, Catton)..... *287
——corrosion. Rhead .....493, 534
——Elastic breakdown. Smith.....535, 537
——Electric copper smelting. Heroult. (P.) ..... *407
——Estimates of temperature by optical pyrometers. Burgess ..... *345
——from ores. Perkin. (S.)..... 221
——Leaching process. Borchers. (S.).. 456
——Monel metal. Browne.....114, 459
——Nickel-copper alloys direct from matte. Browne. (P.)..... 452
——ore ..... 176
——plating. Effect of addition agents. Kern ..... 271
——Precipitation. Ramen. (P.)..... 167
——Precipitation of copper and silver by thionates. Westby. (P.)..... 368
——Precipitation from solutions. Juman. (P.) ..... 407
——Process of Bradley and Lawson..... 293
——Pyritic smelting. Carrick. (P.)..... 127
——refining. Power. Spalding..... 526
——Separation of copper and nickel. Wells. (P.)..... 540
——Standard specifications. Guillet. (S.) 536
——in Steel. Burgess and Aston..... 527
——Titanium. Rossi. (P.)..... 88
——Titanium for alloys. (P.)..... 496
——Welding. Crew. (P.)..... 88
——Zinc-copper alloy. Elliott. (P.)..... *369
——Turner and Murray.....534, 536
CORROSION:
——boilers .....59, 535
——Copper. Rhead .....493, 534
——iron. Heyn and Bauer. (S.)..... 33
——steel. Huntley..... 283
——Walker, Cushman, Smith..... 361
——Protection. Toch .....280, 522
——Zinked Iron Wire and Boiler Tubes. Walker ..... 150
——Inoxidation processes for protection. Lang ..... 351
——and overvoltage. Mott..... 281
Conlometer, Gas. Turrentine..... *279
Court of Patent Appeals. Proposed. Backeland ..... 57
Creosote for wood preservation.....174, 288
Creosote oil from water gas tar. Sadtler.. 360
Crocker-Wheeler Co..... 413
Cupola. Balliott. (S.)..... 84
Cupola economy. Geiger. (P.)..... 126
Cupolas. Osann. (S.)..... 34
Cutting. Oxy-acetylene .....85, *90
——See also Oxy-acetylene.
Cyanide. Electrocyanide amalgamation process. Parks. (P.)..... 539
Cyanide Filter agitator. Hendryx..... *73
Cyanide. Use of lime and increased temperatures. Bishop..... *72
Cyanide of sodium. Carrier. (P.)..... 123
Cyanide. Solution of gold in. Ekeley and Tatum ..... 156
Cyanide. Zinc box precipitates. Coolidge, (S.) ..... 409

## D

DANA & CO..... 547
Davis-Bournonville Co..... 90
Denver Engineering Works Co..... 547
Detinning of tin scrap..... 52
——Electrolytic. Leitch. (P.)..... 124
——Electrolytic and chlorine. K. Goldschmidt ..... *79
——chlorine. Sperry..... 303
——chlorine. Kügelzen and Seward. (P.) ..... 169
Diaphragm for electrolytic cell. Roberts. (P.)..... 495
Dictionary of Chemical and Metallurgical Material .....179, 382
Didier-March Co..... 89
Draft in Steam Boiler Practice..... 94
Driver-Harris Wire Co..... 499
Dry cells. Loveridge..... 523
——Burgess and Hambuechen..... 524
Dryers. Efficiency of Direct-Heat Dryers. Porter..... *480
Drying. W. B. Ruggles..... 506
——J. J. Porter..... 506
Drying. Waste-Heat Air Heater..... *409
Drying transformer oil with sodium.... 136
Dust Collector for precious metals..... *172

## E
